Dear Dr. Loschiavo:

Many thanks for your comments on my remarks at the Panel meeting of the Canadian Entomological Meeting. I must apologize for the rather prolonged delay in answering your letter - you may at times think that things at Ag. Canada grind slowly, however, the pace of University momentum is truly glacial by comparison (at least mine is!). I have to admit to trying to do consulting and attend two Universities at once, plus be on various committees and be Secretary-Treasurer for an arboricultural society. One might say daft? Spread thinly would certainly be the case!

To answer your specific request, I must admit to making up my remarks on my knee during the talk of the speaker before the panel (at least in large measure) and consequently I did not have anything formally prepared. However a number of people have asked for a copy of the remarks and I have set a target (realistic given current commitments) of March to write them up and have them typed.

I trust this will serve your request - which I much appreciate.

I hope the winter weather and the cutbacks (there are always cutbacks?) have not weakened your resolve to meet spring with a glint in the eye!

Regards

Robin Gardner
